TESTIMONIAL TO WHOLESALE DISTRIBUTION

Wholesale Distribution worked with Lexington Public Schools in the repair and protection of our used furniture in all our schools during the 2008-2009 school year. Questions pertaining to supply availability, installation costs and product reliability were all items Wholesale Distribution was able to produce including saving our school system money by working with manufacturers to fix or replace old desk chairs that were still under warranty at no cost to Lexington Public Schools.

The service our school system received from Wholesale Distribution personnel was tremendous. Prompt and courteous service from all personnel at Wholesale Distribution is just some key words to describe this company and its staff. The response time to questions or concerns regarding different products was almost immediate and the individual attention given to each school regarding their own needs was spectacular.

The products and installation of these products were ordered and installed very efficiently and effectively reduced the time our own staff would need to use in order to complete these tasks. Communication between the installers and our individual school custodial staff was done with professionalism, accuracy and in a timely fashion. Accurate records throughout the year and keeping within the budget set by Lexington Public Schools is one of the reasons we enjoyed working with Wholesale Distribution. Estimates on products and billing invoices were quick and easy to obtain and prompt service in producing this information was a nice benefit for our school system.

Lexington Public Schools looks forward to working with Wholesale Distribution in the future.
